PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications using modern frontend and backend technologies including **React.js**, **Next.js**, and **Node.js**. Proven ability to deliver end-to-end solutions – from responsive, performant UIs to robust REST APIs and database design. Experienced in real-time features, third-party integrations, and clean component architecture. Available for freelance projects and open to long-term collaborations.

WORK EXPERIENCE

FULL STACK DEVELOPER at Upwork · Freelance · Remote Aug 2023 - Present

- Providing full stack web development services to clients
- Specializing in React.js, Node.js, Express, and MongoDB
- Building responsive, scalable web applications
- Delivered projects including a full stack e-commerce platform and real-time web applications

FULL STACK DEVELOPER at CoFoundersLab · Full Time · Remote Aug 2023 - Feb 2024

- Built and delivered the Online Advisors Platform as a full stack web application
- Developed responsive frontend using React.js with smooth UX
- Designed and integrated RESTful APIs using Node.js and Express
- Connected and managed MongoDB database for data persistence

SOFTWARE DEVELOPER at Eventum IT Solutions · Full Time · On-site Jul 2022 - Feb 2023

- Developed the frontend of the Entity Files Generator internal tool
- Built a multi-step form UI using React.js
- Integrated frontend with Spring Boot backend via Node.js proxy server
- Worked with Docker for containerized deployment
